DETAILED ACTION

Election/Restrictions

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species I: Claims 18, 34, 53, and 70, which specifically recite the utilization of transistor logic for the serial port.

Species II: Claims 19, 35, 54, and 71, which specifically recite the utilization of transistor logic for the serial port.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

These species were found within elected group II.

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species III: Claims 25, 43, 59, 61, and 78, which specifically recite the push buttons on the reader unit.

Species IV: Claims 27, 41, and 76, which specifically recite the push buttons on the reader head assembly.

Art Unit: 3653

This application contains claims directed to the following patentably distinct species of the claimed invention:

Species V: Claims 28, 44, 63, and 80, which specifically recite the light source on the reader head assembly.

Species VI: Claims 29, 45, 64, and 81, which specifically recite the light source on the reader unit.

In each of the three pairs, a pair of alternatives are given as to the nature of the serial port, the location of the push buttons, and the location of the light source.

Applicant is required to select exactly one alternative from each pair for Examination on the merits.

Currently, claims generic. 15-17, 20-24, 26, 30-33, 36-40, 42, 46-52, 55-58, 60, 62, 65-69, 72-75, 77, 79, and 82-84.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 3653

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel K Schlak whose telephone number is 703-305-0885. The examiner can normally be reached on Mon-Thurs.
